

P3's learning this term will have a focus on Scots Language and the children will have a poem to learn by 24<sup>th</sup> January

There are many things you will be learning every day at home, like making your bed, tying your shoelaces and keeping your room tidy. Here are some ideas you might try which link with learning in school.

## Health and Well Being

We are learning about what makes us unique and celebrating our differences. What makes you the person you are?

Write a descriptive piece about yourself and draw a picture. You could include

- **Your likes**
- **Your dislikes**
- **Your hobbies**
- **Your family**
- **Your heritage**
- **Your strengths**
- **Your challenges**

Want to bring it in and share with everyone? Tell your teacher when you are ready and you can bring it into school.

## Spelling

Try some of these ideas with your word lists – on the next page.

- Write your words in bubble letters and colour them in
- Write them out in capital letters and then lower case letters
- Write them with your eyes closed
- Use an old newspaper or magazine and cut out and stick the letters to make the words
- Type the words using a word processor and try out different fonts, colours and sizes

## Measure

Estimate how tall each person in your house is in cm.

Estimate how long it takes to do 30 star jumps in seconds.

Check both answers using a measuring tape and timer if you have them. How many cms/seconds were you away from the real answer?

What else could you measure or time?

## Read

Borrow a fiction book from school or from your library.

- Draw pictures of your favourite characters
- Think of an alternative title
- Re-write the blurb
- Tell someone what you liked about the story
- Record yourself reading aloud
- Redesign the front cover

## Time

Learn the months of the year in sequence.

How many days are in each month?

Draw pictures to represent the 4 seasons.

Find out when everyone's birthday is in your house. Can you write them on a calendar correctly.
